

First Time School Bus Rider Safety Events

Attention: All Parents of New Bus Students

In August, Student Transportation Services of York Region and Stock Transportation present First Time School Bus Rider Safety Events at various school locations in York Region.

All students, particularly those in Kindergarten or those who have never been transported on a school bus, are invited to attend these events.

Parents and students will be shown a safety video explaining how to remain safe around a school bus by following simple rules and staying away from danger zones.

Each video presentation will be followed with a question and answer information session and instruction detailing how to have a safe trip on a school bus.

Participation is important to help alleviate concerns and answer questions regarding the safety of your children on or around the school bus. **No registration is required.** Simply attend one of the events listed below:
